

The murderer has been caught!
Here's where every
everyone was.

The Zoo

difficulty: expert

1. D is in the Main Area and B is in Concessions. No Visitor be in any Habitat (per the general clue), so G and H can only be alone on the Deck and in the Entrance, in any order. Also, B and someone else are in the Concessions, and G or H is alone in the Entrance. So no one can occupy the Bear Habitat in C14, C15 and C16, block these squares. N can only be beside a tree in the Crocodile Habitat.

2. No Habitat is empty, there are five Habitats remaining. So only M+K and V+the murderer are together, the other Zookeepers must be alone in a Habitat. So J cannot be with N.

This sets J in C8, either in the Penguin Habitat or the Elephant Habitat. Block the rest of C8.

3. Where can E be? C2 is already taken by M. Either G or H is alone in the Entrance. E can only be beside a table in R10 C14, this isolates E.

4. This isolates G, sitting in a chair alone on the Deck. Block the rest of the Deck.

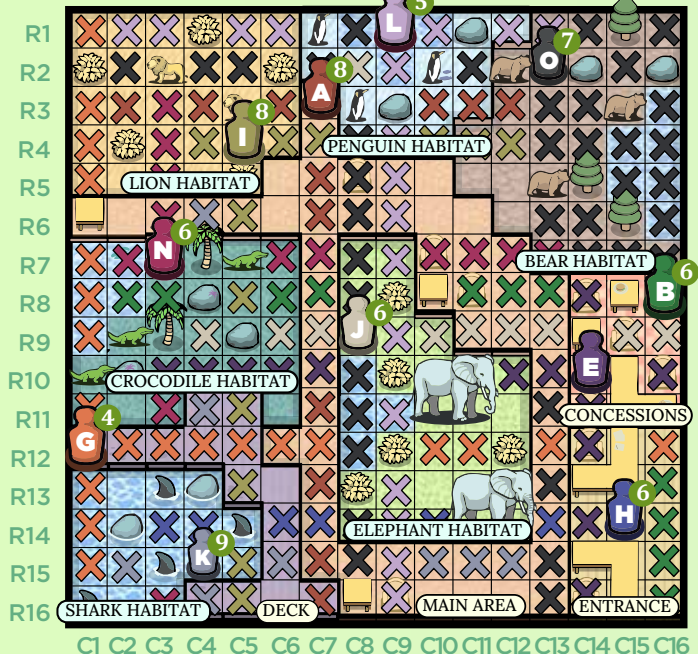

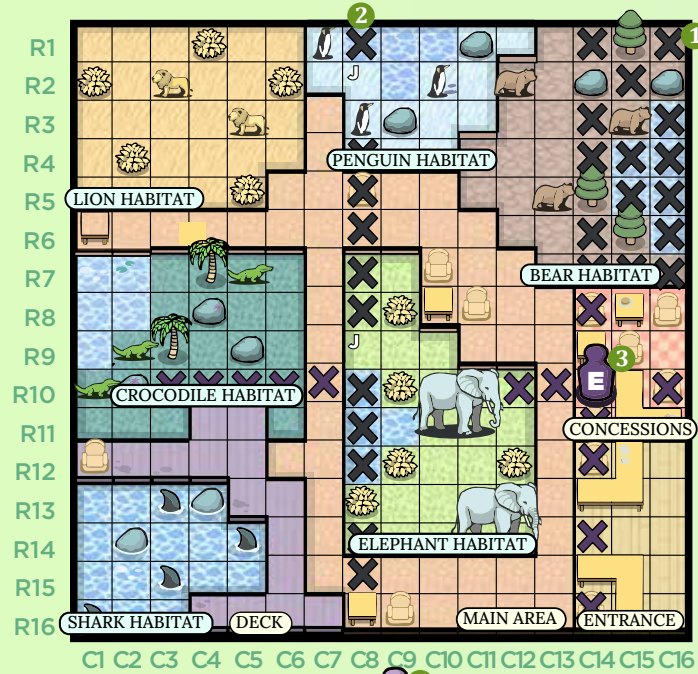

5. L cannot be with N (see Step 2). This isolates L on the last water square not beside an animal.

6. This isolates J in the Elephant Habitat, then B, then N and H.

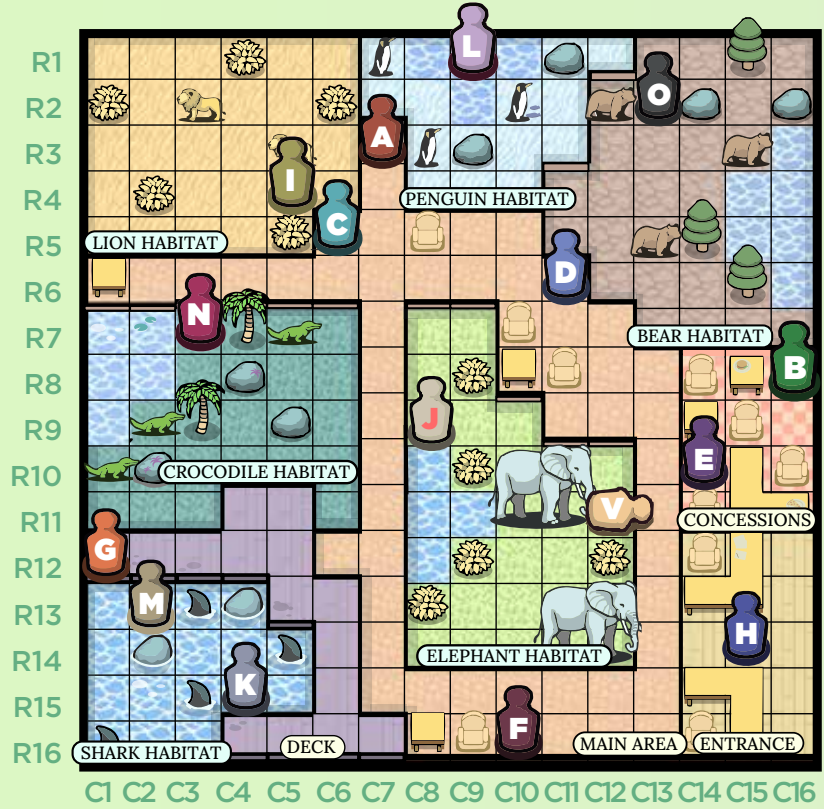

7. This isolates O on the last available square beside a boulder.

8. I cannot be with L, N, J or O (see step 2). Per the general clue, A is in the Main Area. A is also one row north of I. So I can only be beside the lion in R4C5, with A in R3 C7.

9. This isolates K.

11. C and D must be in R5 and R6.
This isolates F beside the last chair, then M with K,
C and D.
12. This isolates V, alone with J in the Elephant Habitat.
Jim is the murderer!

The murderer is...
Jim
